

(a)

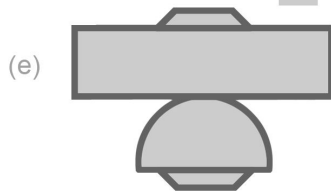

(b)

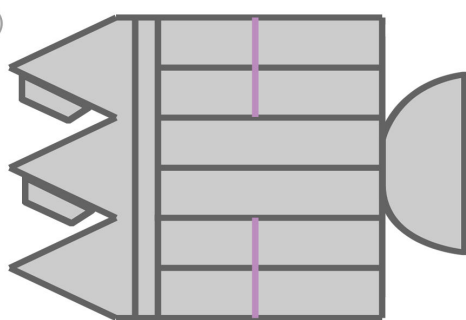

(c)

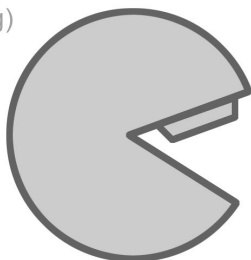

(d)

(e)

(f)

(g)

This is the exposed panel of the Command and Service Module (CSM).

Fold along the dotted lines and tape the tabs behind on the outside to make a box (a).

Secure the two internal panels (b) and (c) to the two thick solid lines.

Fold and secure the half circles (d) and (e), and then attach them using the tabs to the purple rectangles inside of the box. Secure the wires (1) on top of the two half circles.

Fold (f) on the solid lines, secure the back half circle, and the triangles in the front. Cut on the purple lines, and place inside the box near the two thin lines.

Make the antenna (g) into a cone, and secure the tab on the back. Secure to the small triangle near (f) facing the cone forward - in the direction of the triangle.

Cut out these explosion flames, and save for later.
