

(hull - back side)

(wing - back side)

Cut along the red dotted line. Fold the wing and place the tabs through the slot on the hull (with the back side towards the back of the ship). Fold the tabs out and tape them to inside of the hull.

Fold the hull on the dotted line. Fold the hull again along the solid lines starting with the 3rd line from the back (1st near the dotted line) to create a "curve" in the hull.

Tape the tabs from the inside part of (a), (b), and (c) to itself to close the gap. From there, tape the outside tabs on the left to the right side of the other part of the ship. (a) will connect to (b)'s right side. and (b) will connect to (c)'s right side.

While getting the ship together, don't forget to add your flames to the back of the ship. You may need to cut some of the tabs in the back to make the flames fit.

So, at the end of this point, there should be: screaming, anger, and three sides of the ship together - with red flag wings and flames connected.
